- Certified Full Stack Developer from ApnaCollege

ACADEMIC PROJECTS:

Wanderlust: (Regarding The AirBnb to connects people who want to rent out their property who are looking for the accommodations, for short stays):

Developed a dynamic Airbnb clone utilizing HTML, CSS, and JavaScript for the frontend to ensure an engaging user experience.

- Implemented the backend functionalities using Node.js and Express.js, enhancing the application's responsiveness and performance.
- Integrated MongoDB as the database solution to efficiently manage and store data, ensuring seamless retrieval and manipulation of information.
- Utilized the Bootstrap framework to design and implement a visually appealing and responsive user interface, optimizing accessibility across various devices.
- Orchestrated user authentication features such as login, signup, and logout using Node.js and Express.js, ensuring secure access to the application
- Implemented robust error handling mechanisms and validation techniques to enhance user-friendliness and maintain application integrity.

Weather App (To check the current weather patterns of a particular location):

- Developed a Weather App to enable users to check the current weather conditions of specific locations. Implemented additional functionality to dynamically change the background image based on weather parameters such as temperature and humidity..
- Utilized Material UI to enhance the visual design and user interface elements, providing a modern and intuitive interface
- . Integrated APIs such as Open Weather to retrieve real-time weather data for accurate weather information.

Schedule App (To add tasks to your daily routine):

- Developed a Schedule App to facilitate users in adding tasks to their daily routine. Implemented features allowing users to mark tasks as done upon completion and to delete tasks as needed.
- Developed using React.js for building the frontend interface, ensuring a responsive and interactive user experience.

Chatting App Clone (Allows users to create, edit, and delete chat messages):

- Developed a Chatting App Clone with features resembling popular messaging platforms. Users can create chat messages, edit existing messages, and delete messages as needed. Implemented a MySQL database to store and manage chat data efficiently.
- Utilized MySQL database for storing chat messages, enabling efficient data management and retrieval.
- Implemented backend functionality using Node.js and Express.js to handle HTTP requests and interact with the database.
- Developed the frontend interface using HTML, CSS, and JavaScript, providing users with a seamless and intuitive messaging experience.

SKILLS:

- Frontend Development:
 - HTML, CSS, JavaScript: Experienced in building responsive and interactive user interfaces.
 - Bootstrap: Skilled in utilizing Bootstrap framework for designing modern and visually appealing frontend layouts.
- Backend Development:
 - Node.js, Express.js: Proficient in developing backend server logic and handling HTTP requests using Node.js and Express.js.
 - React.js: Experienced in building dynamic and interactive user interfaces using the React.js library
- Database Management:
 - SQL, MySQL: Skilled in writing SQL queries and managing relational databases, including MySQL.
 - MongoDB: Experienced in working with MongoDB, a NoSQL database, for efficient data storage and retrieval.
- Version Control:
 - Git, GitHub: Proficient in using Git version control system and GitHub for collaborative software development and version management.
- Additional Skills:
 - Tailwind and Redux (Basic): Familiar with Tailwind CSS framework and Redux state management library, providing additional tools for frontend development.

PERSONAL INFORMATION:

Father's Name : Mr. Aftab Ahmad
Marital Status : Single
Gender : Male
Nationality : Indian
Language Known : Hindi & English
